Tonight's Sky, Softly

Boulder · Friday, the twenty-third of October 2026 · 19:30

Hold the card above your head with the N pointing north.

Tonight, look for:

- ☐ The Moon: waxing gibbous, high up in the south-east
- ☐ Saturn: a little way up in the east
- ☐ Vega: very high in the west
- ☐ Altair: very high in the south
- ☐ Deneb: almost straight overhead
- ☐ Overhead: Cygnus
- ☐ Shooting stars: the Orionids

Computed from real ephemeris for this place and time.
